CAMP FURNITURE

CANVAS COVERS

FOR BINDERS, THRESHERS, HOLLERS, HAY STACKS, HORSES, WAGONS
AND ALL KINDS OF MERCHANDISE

TOLEDO, OHIO, U. S. A.

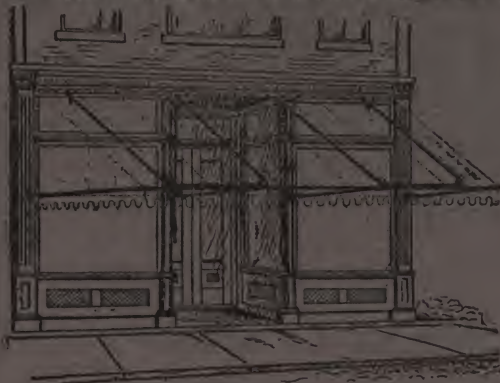

Directions for Measuring Store Awnings

First determine the place where the joints of the frame will be fastened to the building, which should be from 7 to 8 feet from the sidewalk, according to the height of the front (see diagram below) you will observe that the curtains—15 inches deep—drop below that point, for which you will have to allow in clearing people's heads. Then measure from there to where top of Awning can be fastened above the windows, which will be the distance from 1 to 2; or height of Awning measurement from 2 to 3, in a high building should be the same as 1 to 2, but in a low one, a little more. Then measure the width of store from center of column on one side to the same on the other side, which will be the distance from 3 to 4, or width of Awning. If the top of the window, where the Awning is to be attached, projects beyond the face of the building, or is back out of level, mention how much. When ordering a frame, state whether it is to be fixed in wood, brick, iron or stone, and whether the door posts, face of building and pillar columns are in line, also whether the frame requires four or more arms or projecting rods.

Directions for Putting Up Store Awnings

First ascertain the height of the Awning, that is from 1 to 2—measure that distance down the house from figure 1 in diagram, which is the place for the joints (see diagram below); if the columns are iron they will have to be bored and tapped, and the ends of the joints threaded to screw in; if stone or brick, make holes 3 inches deep, and wedge them firmly with hard wood, or lead; if wood, fasten on with screws. Be careful to have the joints in line, and if any of the columns stand back, put the long joints on them; now fasten the bars to the joints with the joint screws. Put up the pilleys and ropes, as shown in diagram. Now take the Awning, and, while the frame is in the same position as shown in the diagram, take off the outside nuts, put the ends of the front rod through the large holes in the corners of the Awning and replace the nuts outside the Awning; tie to the front rod with the tarred string, then raise it up and fix the top to the front at the proper height from the joints; let it down again and tie on the ends to the bars, and it is finished.

Please ship to

the following order for _____ Awning with _____ Frame and Fixtures as noted below:

Description of Cloth _____ Class _____

Distance from 3 to 4, _____

" " 2 to 3, _____

" " 1 to 2, _____

If Frame Is Required, Fill Out the Following

Number of Joints for Wood, _____

" " " " Brick, _____

" " " " Stone, _____

" " " " Iron, _____

Where Top Fastens { If Recess, how much? _____
If Projects, " " _____

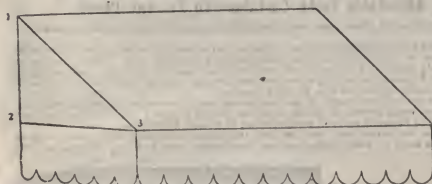

Columns, Where Joints Fasten

State if in line _____

If back out of line, which one, and how much? _____

Read Carefully These Directions for Measuring

First, determine the place where the joints of the frame will be fastened to the building, which should be from 7 to 8 feet from the sidewalk, according to the height of the building (see figure 2 on diagram); you will observe that the curtain—15 inches deep—drops below that point, for which you will have to allow for clearing people's heads. Then measure from there to where top of awning can be fastened above the windows (see figure 1 in diagram), which will be the distance from 1 to 2, or height of awning; 2 and 3 in a high building should be the same as 1 and 2 but in a low one, a little more. Then measure the width of store from center to center of outside columns, which will be the distance from 3 to 4, or width of awning. If the top of the window where awning is to be attached, projects beyond the face of the building or is back out of level, mention how much. When ordering a frame state whether it is to be fixed in stone, brick, iron, or wood, and whether the door posts and face of building or outer columns are in line; also whether the frame requires four or five or more arms or projecting rods.

If any Lettering is desired, note it on this Diagram.

THE HETTRICK BROTHERS CO., TOLEDO, O.

What We Claim for Our Belt Chain Roller Awning and Fixtures.

It is the result of practical experience extending over many years in this particular branch of the business. We are manufacturing what are, without question, the most durable and satisfactory fixtures on the market. Simple in construction, easy to operate, will not get out of order, and will last for years.

We make and assemble the fixtures, each part receiving personal inspection, and guaranteed to be free from defects.

On opposite page we have illustrated the various parts of the Belt Chain Roller awning fixtures. All fixtures are mounted on a Back Board and covered with a Roof Board.

End Supports for roller are made from heavy Boiler Steel with Brass Bearings. This closes the ends, so there is no danger of goods catching in sprocket wheel, which is placed on the outside of end support. When awning is rolled up, our fixtures protect it from storm and dirt in best possible manner, thereby greatly prolonging the life of the goods.

Our Center Support is one of the main features of this style awning. It is so constructed, that large roller always has an even bearing on smaller rolls, no matter what quantity of material has been wound upon it. This reduces the friction to a minimum and prevents less chafing and wearing of cloth where it strikes these rollers. These supports are made of malleable iron, which material is also used in the Roof Brackets, and they cannot break. All of our fittings are much superior to the ordinary gray iron castings usually furnished for this purpose.

For raising and lowering the Awning, we use No. 32 Link Belt Chain, made of detachable malleable iron links. The strongest chain made for the purpose. The chain does not stretch. It can be readily adjusted to proper length, as any link can be removed at will.

The Sprocket Wheel is usual pattern required for this chain, and is secured to roller journal by means of small set screw.

Crank Box is of universal pattern, reversible and can be used on either end of awning—also adjusting arrangement to take care of slack in chain.

Directions for Measuring and Hanging Belt Chain Roller Awnings.

Measure width of front of building where frame will fasten, allow 4 inches for SPROCKET WHEEL and CHAIN to pass on outside of Frame. Other measurements necessary are same as ordinary drop awning.

To place in position—Locate place for fastening BACK BOARD. Be sure and have this high enough. Secure in place with screws or bolts furnished for this purpose.

Screw ROOF BRACKETS on BACK BOARD.

Fasten on CENTER SUPPORT and END SUPPORTS to bolts placed in BACK BOARD, putting ROLLER in position before securing last END SUPPORT.

In placing ROLLER in position, decide where you will put CHAIN and BOX. Screw SPROCKET WHEEL on this end; fastening it on outside of END SUPPORT (see cut). Be sure it is fastened firmly in place.

Tack the AWNING on the ROLLER, fastening both ends first and see that it hangs square. Use seam in ROLLER for line. Then tack balance and divide slack up evenly.

Fasten FRAME to building in usual manner. Before putting on the frame fastenings, measure END WING from 1 to 2 (see cut) and place these fastenings accordingly.

Examine cut of AWNING IN PLACE. Notice top of WING fastens underneath the ROLLER; lower corner to end of frame, and then to frame joint in the wall of the building; thus allowing wing to fold back when awning is rolled up (WING does not roll up).

After WINGS are up, secure front of awning to front rod of FRAME in usual manner. Roll up Awning; screw on ROOF BOARD and Awning is ready for use.

Price List Belt Chain Roller Awning Fixtures.

Box and Crank.....	\$3.00 each.
Chain No. 32.....	.16 per foot
Center Support complete.....	4.00 each.
End Brackets.....	2.00 per pair.
Sprocket Wheel.....	1.50 each.
Roof Brackets.....	.20 each.
Back Board.....	.12 per foot.
Roof Board.....	.12 per foot.
Rollers with pins.....	.20 per foot.
Bolts or Lag Screws.....	.36 per set.

Our Center Support required for Rollers measuring 25 feet or less, and an extra support for each additional 10 feet on length of roller.

Descriptive Price List of Awning Frames

Price List of Four Arm Frame.

$\frac{3}{4}$ inch Iron.....	10c per lineal foot.
$\frac{3}{4}$ inch Iron.....	16c per lineal foot.
$\frac{1}{2}$ inch Pipe.....	16c per lineal foot.
$\frac{3}{4}$ inch Pipe.....	20c per lineal foot.
1 inch Pipe.....	24c per lineal foot.

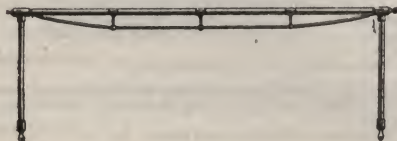

In figuring cost of this frame, add length of front rod to total length of arms required, and multiply by price per foot of material desired.

Wood Front Bar Frame.

With $\frac{3}{4}$ inch Iron Arms.....	10c per lineal foot.
With $\frac{3}{4}$ inch Iron Arms.....	16c per lineal foot.
With $\frac{1}{2}$ inch Pipe Arms.....	16c per lineal foot.
With $\frac{3}{4}$ inch Pipe Arms.....	20c per lineal foot.
With 1 inch Pipe Arms.....	24c per lineal foot.

In figuring the cost of this frame, add length of front rod to total length of arms required, and multiply by price per foot of material desired.

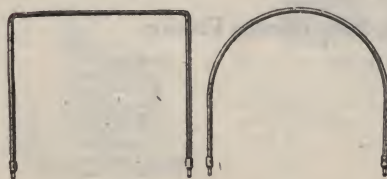

Brace Frame.

Always Made of Gas Pipe.

$\frac{3}{4}$ inch Pipe.....	20c per lineal foot.
1 inch Pipe.....	24c per lineal foot.

In estimating cost of brace frame, add together twice the length of the front bar and total length of both arms, and multiply by price per foot of material desired.

Round and Square Frames.

(For Section and Window Awnings.)

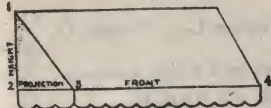

$\frac{1}{2}$ inch Iron.....	8c per lineal foot.
$\frac{3}{4}$ inch Iron.....	10c per lineal foot.
$\frac{3}{4}$ inch Iron.....	16c per lineal foot.
$\frac{1}{2}$ inch Pipe.....	16c per lineal foot.
$\frac{3}{4}$ inch Pipe.....	20c per lineal foot.
1 inch Pipe.....	24c per lineal foot.

In estimating cost of bent frames, multiply the total length by the price per foot of material desired.

The above quotations include Pulleys, Cleats and Fastenings necessary for same.

Directions for Measuring Window and Door Awnings.

In ordering these Awnings the measures to be taken on the Door or Window Frames, not on the brick work, and in all cases state the shape of top of window, giving name of shape from our diagrams.

Give the height of the window in center, breadth from casement to casement, describe the shape caps, stating whether square, segment, oval, circular or round, also the measurements of same, following the dotted lines as shown in cut. Always state if awnings are wanted for the first story or stories above. If for the first story, state height of window sill from ground.

Directions for Measuring Porch Awnings.

Measure Same as Store Awnings

THE HETTRICK BROTHERS CO., TOLEDO, O.

DESCRIPTION AND PRICE LIST

Old Style Roll Awnings for Stationary Frame.

Directions for Measuring.

First state width across front of building, then total length of canvas, measuring from point where it fastens to building to outside of roller. If roller is not required, state diameter so pocket for same will be made proper size. Also state length of Awning that hangs over front of frame. If end pieces or wings are desired, give their exact height, projection and length of rafter, stating manner in which they are fastened to frame.

Price List of Roll Awnings.

Material.

Class A.....	4 cents per square foot.
Class B.....	5 cents per square foot.
Class C.....	6 cents per square foot.
Class D.....	7 cents per square foot.
Class E.....	8 cents per square foot.
Class F.....	9 cents per square foot.
Class G.....	10 cents per square foot.

Price includes canvas, rope and hooks.

Wood roller, 15 cents per lineal foot.

Write for special estimate on stationary frames when desired

PORCH CURTAINS.

These are usually made with a roller at the bottom, just above the scalloped edge, and there concealed in a hem. The top of the curtain is fastened on the inside of the porch to the ceiling or other even surface in such a manner that when the curtain is down it will not interfere with bracket work or other projections. By fastening the ends of ropes at the top, and just outside the curtain, then passing them underneath the roller at bottom and again up to the top on the inside, where they are lead through pulleys, the curtain is made to roll upward from the bottom and around the roller.

Directions for Measuring

Give measurements, full length from ceiling to bottom of scallop, and full width from side to side. Give diameter of roller if we are not to furnish it.

Price List of Porch Curtains.

Material

Class A.....	9 cents per square foot.
Class B.....	10 cents per square foot
Class C.....	11 cents per square foot
Class D.....	12 cents per square foot
Class E.....	13 cents per square foot
Class F.....	14 cents per square foot
Class G.....	15 cents per square foot

Price is for Curtains complete with rollers and fastenings.

Should poles not be desired, a discount of 5 per cent. may be taken from the above list prices. Should higher wall be desired than specified in the list, 5 per cent. for each additional foot or fraction thereof should be added.

The use of a Grave Tent upon a single occasion pays for itself when it is found necessary to conduct a burial service on a rainy day or in January wind that brings a zero chill to each person exposed.

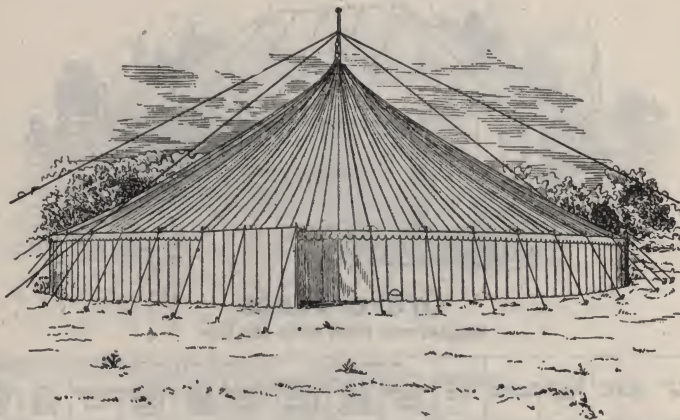

The commendation of those receiving the benefit is an advantage favorable to the undertaker that can be measured only by subsequent business that comes to him.

Tent can be set in ten minutes. When ground is frozen, drive small iron stakes to which fasten the ropes.

To afford shade on a hot day, no side wall is needed.

To keep out a driving rain or cold wind, wall on two sides only is necessary. To afford the most comfortable warmth or cut off the observation of a curious crowd, wall on four sides is desirable. If complete wall is purchased, you can meet any of these requirements.

We also furnish Canopy, with or without walls, which reaches from Grave Tent to place where carriages are unloaded. Prices given on application. When circumstances warrant, the ground under Tent and Canopy may be covered with matting and the arrangements thus provided are unquestionably the best that sharp competition and progressive thought can devise.

Black Wall Tents

Complete with Poles, Stakes and Guye.

The above Tent is 24x56, with 10 foot wall. Made of 10 oz. Black Duck; lined throughout with black 6 oz. drill. This Tent is made with quarter poles and with ridge poles across between quarter poles to sustain short center poles, thus doing away with the long center poles, giving an unobstructed view for the interior. Made with wall to pull up with ropes at side poles, also hook between poles, double border and end pin. Sod Cloth at bottom to lay on the ground, thus making it perfectly dark. Exhibitors who have used our Tents of this construction have been well pleased with them. Prices on different size Tents quoted on application.

Oblong Round End Black Tent

Complete with Poles, Stakes and Guye

Made of 10 oz. Black Duck, lined with 6 oz. Black Drill throughout. Walls to hook on, Sod Cloth around the bottom to lay on the ground and exclude the light. Made with two center push poles. We make many different styles of these Tents to order.

Prices on different size Tents quoted on application.

Black Wall Tents With High End, Square

Complete with Poles, Stakes and Guye.

This Tent is 27x55 ft. with 9 ft. walls, which are sewn on, but they can be made portable if desired. The back end is cut with a gore at the top to give width for the picture. The last center pole is left out and the roof is supported by quarter poles.

Prices on different size Tents quoted on application.

Black Wall Tents With High End, Peak

This Tent is similar to the one above, 27x55 ft., except that it has 8 ft. walls and the center pole at the back end is made higher and the gore left out. This makes it more water proof. This tent is made with portable walls, double curtains and Sod Cloth to exclude the light. The inner curtain is made one width deep.

Prices on different size Tents quoted on application.

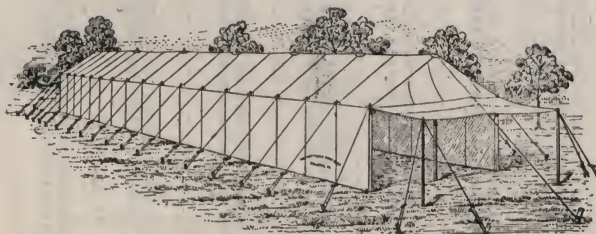

Merry-Go-Round Stationary Top Tent

Furnished in any material and of any size, with or without poles and stakes.
Prices on different sizes quoted on application.

Merry-Go-Round Tent Top Revolving with Machine

Furnished in any material and of any size. Prices on different sizes quoted on application.

Bowling Alley and Shooting Gallery Tents

Complete with Poles, Stakes and Gays.

The above Tent is 14x80 ft., with 6 ft. walls. Made of any weight duck desired.
Prices on different size Tents quoted on application.

COAL BAGS

Capacity 100 pounds

Patent Bag

Made of best sail duck, same as No. 4. Fitted with iron standards on sides to prevent bags collapsing.

These bags can be used in place of baskets—are more convenient, better made and much cheaper.

Price, \$1.00 Each

This Bag made of India Hemp,

Price, 85c Each

Capacity 100 pounds

No. 4 Bag

Made of best Sail Duck.

Extra Heavy Double Bottom and strip up the sides.

Rope around the top to keep bag open when filling with coal.

Rope Handles both Top and Sides.

Bottom Handles for easy dumping. Sewed with soapy sail twine and made throughout in the best possible way for long use.

Price, 85c Each

This Bag made of India Hemp,

Price, 70c Each

Capacity 100 pounds

No. 5 Bag

Our No. 5 Bags are made with Canvas Handles as shown. Otherwise same as No. 4.

Our Bags will last for years. Use them and save time and money.

By their use you can deliver several orders in one load.

Price, 75c Each

This Bag made of India Hemp,

Price, 60c Each

Capacity 100 pounds

No. 6 Bag

Single Bottom and Sides.

One Set Rope Handles.

At top heavy patch for Handle Holes. Otherwise same as No. 4.

COME TO STAY among retail coal dealers, saving time and expense when carrying in coal; no dirt or dust.

They are easy to handle with our latest improvements.

Price, 65c Each

This Bag made of India Hemp,

Price, 50c Each

COIN BAGS

Only the best material is used in the manufacture of our Bags, and each bag is double sewed. The amount is plainly printed on each, unless otherwise ordered.

We make Banners of every kind and description. It is not possible to list prices of all kinds of banners, but we are pleased to estimate on any description of a banner sent us. If possible, submit a rough sketch or design, stating amount of money you desire to spend for such a banner, and we will be pleased to furnish lowest price.

Banners are made usually of silk, but we can furnish them of satin, sateen, plush, bunting, felt, cloth, canvas, etc., with lettering painted in colors, gold or silver leaf, embroidered in silk, or bullion or sewed on. Prices vary according to size, style and quality.

Silk Flags of all sizes and kinds quoted on application.

12	120	2.76	3.67						

Endless belts add 3 feet extra for splices.

Durability.

The Hetrick Belt wears equal to leather under ordinary circumstances, but in work where exposed to steam, heat, cold, acids, dampness, grit, dirt, dust, etc., it will outlast any other belt. We ask, if a belt that will outlast leather and don't cost but half as much, is not a good proposition?

Stretch Reduced

By our new and improved process. You do not have to shut down to "take up the stretch" in Hetrick Belts. Try a Hetrick Belt. You will like it, and we guarantee every belt we make.

Strength.

In the Hetrick Belt the resisting power is increased one-third as compared with rubber, leather or other all-canvas belts. When other belts "fall down," the Hetrick Belt will come to your rescue and do the work. Send for a sample belt, give it a trial and you will save annoyance and money.

Use 8-Ply in place of double Leather, or 5 or 6-Ply Rubber, and 10-Ply only in belts where extraordinary strength is required.

Use 4-Ply in place of single Leather, or 3-ply Rubber. 6-Ply in place of light double Leather or 4-Ply Rubber.

Three feet extra is charged for making belts endless.

They are guaranteed to run perfectly straight, and are of even thickness throughout.

Heat, steam, damp, gas, or fumes from acids in fertilizer factories, does not affect them.

They will not freeze or get hard during most extreme cold.

INSTRUCTIONS—The holes for lacing should be made with a pointed awl, and not with a hollow punch, as the latter cuts away the threads and weakens the belt. For ordinary belts the end to end or jump joint is the best. The joints of heavier belts may be made by placing a piece of the same over the joints and fastening with bolts, rivets or laces. Where a tightener is used, or for lap joints, the belts can be tapered down at both ends.

Flexibility.

We admit that the ordinary canvas belt is not as flexible for small high speed pulleys as leather, but we have overcome this objection by the use of our patent preparation, which is applied not only once or twice but several times, until the pores of the belt are thoroughly filled, rendering the belt very pliable, especially when in use.

Won't Slip.

Owing to the close stitching and nature of the surface of the Hetrick Belt, it adheres to the pulley much better than leather and largely increases the driving power.

The Hetrick Belt Best For

Flour Mills, Saw Mills, Paper Mills, Pulp Mills, Cotton Mills, Woolen Mills, Oil Mills, Mines, Smelters, Bleachers and Dye Works, Brick, Tile, Stone and Cement Works.

Gold Medal Camp Furniture is far superior to anything of the kind ever offered to the public for Comfort, Strength, Compactness, Simplicity and Utility for Tourists, Travelers and Sportsmen, for the home and in the city, country or seaside, these goods have no equal.

The Hettrick High Grade Folding Vapor Bath Cabinet

Some of the many reasons why it is the best.

HEALTHFUL, Because

It is the simplest in construction.
It is the most convenient to use.
It has a door WHICH IS A DOOR.
It has no wood work to warp and get out of shape.
It has a tight but firm and substantial steel frame.
It folds into an inch space when not in use.
It does not crush together and crack the cloth.
It is so neatly handled that a child can manage it.
It is made of the very best materials.
It has no complicated legs to adjust.
It has no troublesome towel to fix.
It needs no attention in using it.
It has no bevels, buttons or hooks to be fastened.

REFRESHING, Because

It is the most Cleansing, Refreshing and Invigorating
It is the surest means of Clearing the Skin.
It is certain to Purify the blood.
It Eradicates Liquor and Tobacco from the System.
It immediately Relieves Rheumatism and all Skin, Blood, Liver, Kidney and Nerve Diseases.
It will Relieve Female Irregularities.
It will at once Cure the Worst Cold.
It will Alleviate all the distresses occasioned by Catarrh and Anemia, if used in connection with the Face Steaming & Treatment.
It has no equal, either as a Preventative or Curative, in all Eliminating Diseases, and for ordinary Bathing Purposes is Unrivalled.

INVIGORATING, Because

It has a real top, not curtains belted together.
It has no inexcusable corners where the germs of disease can secrete their mission.
It has all the very latest improvements.
It has the best heating lamp yet devised, avoiding every discomfort and annoyance.
It can be taken completely apart and thoroughly cleaned.
It is therefore cleaner and consequently healthier than others.
It more than fits every requirement.
It is absolutely perfect as possible.
It does its work better than any other.
Price, \$5.00 Each. Face Steamer, \$1.00.
